RED HAVEN  
BIG MONEY MAKER

Harrison's Maryland Grown Peach Trees are the 
Finest Quality in the World

RIO-OSO-GEM  
BEST LATE PEACH

SPECIALIST IN GROWING  
HIGH QUALITY—SUPERIOR STRAINS—EARLIEST TO BEAR  
TRUE-TO-NAME FRUIT TREES FOR SEVENTY-FOUR YEARS
TODAY FRUIT GROWING is making inroads on the big farms—little orchards lead the way to a profitable and worth-while fruit market.

PLANT WITH HARRISONS’ BUD SELECTED SUPER STRAIN FRUIT TREES

IT’S YOUR OPPORTUNITY TO PLANT THE BEST THERE IS IN FRUITS AT LOW PRICES

ONE-YEAR APPLES

GET YOUR ORDER IN EARLY. Growers with a vision to the future should capitalize now by planting new orchards. You get the biggest dollar’s worth from Harrisons’, both in quality and price.

FACTS WORTH READING ABOUT

MONEY IN FRUIT GROWING

Leading Orchardists Prefer Harrison Grown Fruit Trees

ALIVE HEALTHY FRUIT-BEARING TREES DEPEND ON THE HEREDITY OF YOUR TREES

In the summer and early fall of each year, while fruit was on the trees, the utmost care was exercised in selecting the new “bud stock” from extra, vigorous, bearing trees showing superior strains with extra heavy bearing habits for the young Harrison fruit trees developing in the nursery.

YOU PAY NO MORE FOR HARRISONS’ “BUD-SELECTED” TREES

The “bud-selection” method to propagate is very expensive—but whatever the expense they are the trees that give satisfaction. Remember the inborn inheritance is the final quality built into Harrisons’ trees. The young fruit trees are first generation from bearing.

FINEST QUALITY FRUIT TREES ARE PROPAGATED FROM BEARING ORCHARDS

IF fruit trees are continuously propagated from the nursery rows, as practiced now by a large percentage of nurserymen, because it is cheaper, fruit trees begin to degenerate—and when the original was a poor type, the nurseryman, without knowing it, continues to reproduce poor, undesirable, small type fruit. Incidentally, in case there was a mixture in the nursery rows, how could a nurseryman propagate true-to-name trees successfully. Nothing can compare with our scientific method of “bud selection”—it always gives complete satisfaction.

HARRISON GROWN FRUIT TREES IN WORCESTER COUNTY, MARYLAND, ARE CERTIFIED BY THE UNITED STATES DEPARTMENT OF AGRICULTURE TO BE “FREE OF VIRUS DISEASES.”

WE SHIP TO ALL OF THE 48 STATES AND CANADA.
LET'S GIVE THE CONSUMER A TREE-RIPENED PEACH

Roadside Marketing A GOOD SIDELINE

Roadside fruit stand with a small orchard will make a much higher net cash profit, than generally a large size farm.

HALE HARRISON BRILLIANT PEACH

HALE HARRISON BRILLIANT PEACH

A sure and economical way to satisfy your customers with tree ripened fruit for fresh eating, table use and home canning as well as fresh freezing.

Harrisons' Super Selected Trees

with their unusual substantial root system, are proving again and again that "bud selected" strains spell yearly profits to orchardists and commercial planters.

HALE HARRISON BRILLIANT PEACH

G. HALE HARRISON GRADUATE OF HORTICULTURE CORNELL UNIVERSITY

Many growers also sell apples, pears, plums, strawberries, cherries, apricot & nectarines on their roadside markets.

HALE HARRISON BRILLIANT PEACH

Has "EYE and TASTE" Appeal.
"IT IS THE BEST".

A GENEROUS SUPPLY OF PEACHES CAN BE MAINTAINED OVER A 12 WEEKS PERIOD BY PLANTING HARRISONS' SUPERIOR SELECTED VARIETIES.
The World's Greatest Peach

The sensational Peach which has caused the greatest amount of favorable reports of any Peach introduced in a half century is that marvelous, big Peach, the World's largest, being a patented variety, the Rio-Oso-Gem. U. S. Patent No. 84. It has now been grown in all Peach-growing districts in the United States and Canada, and has definitely proven itself to be the best all-around commercial Peach. Ask any man who has grown the Rio-Oso-Gem.

THE BEAUTIFUL GLOREIFIED PEACH

This beautiful Peach has a brilliant, bright red color, running around 95%, good red, whereas they are easy to pack as U. S. Fancy grade. The size of the Peach is all that anyone can expect, as many of these Peaches will run a pound or more in weight and in many instances have been reported that the crop would average three-quarters pound per Peach. The flaming, beautiful bright red color in the cheek, along with an attractive orange-colored background, has earned it an enviable reputation as being the prettiest Peach grown.

BEST FLAVORED COMMERCIAL PEACH

The unexcelled flavor is better than that of J. D. Moore and Elberta. The enticing flavor makes it a very popular Peach for fresh eating. The rich flavor is retained when canned or preserved. Now recognized as the leading comprehensive Peach of California a Rio-Oso-Gem is the only Peach which can be processed by quick freezing and still retain its firm texture with its beautiful rich, golden yellow flesh and the same flavor as when picked. We have quick frozen Rio-Oso-Gem Peaches, which were picked and processed on September 1, 1944, which are still holding up in excellent condition.

RECORD BREAKER FOR LONG DISTANCE SHIPMENTS

The Rio Oso Gem is the best of all Peaches for long distance shipments and the fruit will stand up longer after being picked than any other variety of Peaches known. This stupendous variety adapts itself exceedingly well for shipments in refrigerators on the coast, under standard refrigeration for transcontinental hauls. This is the greatest Peach for shipments on trucks under ventilation, as its hard, firm texture insures arrival in excellent condition.

NATION'S HIGHEST NET CASH MONEY-MAKER

RIO-OSE-GEM

IDEAL FOR HOME ORCHARDS

Starts to ripen 7 to 10 days later than Elberta. Rio-Oso-Gem is a very prolific bearer and dependable annual cropper.

RIO-OSE-GEM IS NO EXPERIMENT

Colonel and Mrs. Frank Sleeter, Round Hill, Virginia, wrote, "We have the land ready for the 600 Rio-Oso-Gem peach trees, 5 to 6 feet for April, 1950 planting. It is a wonderful peach and we have had marvelous results marketing it last year at $6.00 per bushel, in spite of the low market price prevailing during the summer of 1949."

Destined to be America's Leading Commercial Peach. Sample of Rio-Oso-Gem Grown in Harrisons' Orchards at Berlin, Maryland. Sold only by Harrisons' Nurseries in numerous states.

READ WHAT FELLOW GROWERS SAY

We have received several hundred complimentary letters highly praising the Rio-Oso-Gem Peaches. U. S. Plant Patent No. 84. From all over the United States, some of the typical remarks are from people such as Russell-Graham-Adlerson Company, Forest City, Arkansas. "We have about 1,000 of Harrisons' Rio-Oso-Gem Peach trees from which we have been harvesting the very finest Peaches I ever saw. We sold our Elberta Peaches. U. S. No. 1 grade at $2.25 per bushel and we had no trouble in picking the Rio-Oso-Gem Peaches 2 1/4 inches and up which we sold at $4.00 per bushel. F. o. b. Forest City, Arkansas." Mr. H. Frank Smith, Prop. Hillcrest Orchard, Dover, Arkansas, writes: "This year's crop convinces me that the Rio-Oso-Gem, U. S. Plant Patent No. 84, is the very finest Peach and has certainly proved itself with me. It has very fine qualities as a canner and people go wild about it. It always brings the highest prices for me."

Mr. Charles Heilig, Sewell, New Jersey, Gloucester County, said that the most handsome and the best Peach of the forty years' experience that he has had was his first crop of Rio-Oso-Gem on 400 trees, three years old, from which he picked during early September. 324 bushels and which he sold at an average price of $5.00 per bushel at his farm, grossing him more than $1,600.00 from this very young orchard. He bought 620 Rio-Oso-Gem trees for planting November, and said his future plantings would be Rio-Oso-Gem.

AMERICA'S MOST FAMOUS PEACH

Mr. E. R. Connor, fruit grower and broker, of Stephen City, Virginia, in the famous Frederick County fruit section, was exceptionally well pleased with his first crop of Rio-Oso-Gem Peaches on his three-year-old trees which he picked during early September. From his 400 trees, three years old, he picked a 300-bushel crop for which he was offered $3.75 per bushel, f. o. b. Stephen City, Virginia, for the entire crop, but he refused the sale so that he could sell the Peaches on more profitable quantities at high prices to his customers throughout the Shenandoah Valley of Virginia and nearby cities. He planted 100 trees two years ago which had a few Peaches on them this summer. Connor states he wishes he had 5,000 Rio-Oso-Gem Peach trees, U. S. Plant Patent No. 84, planted in his Orchard instead of 500.

RIO-OSE-GEM IS A "MUST" FOR EVERY GROWER

There are still big cash profits in Peaches, provided you grow the right varieties and in the near future you will see where the Rio-Oso-Gem, U. S. Plant Patent No. 84, will be getting more prominence each year. It is predicted that within a decade or so, it will be the most extensively planted commercial Peach in America.

The Peach of the Future

Hale Harrison
U.S. Patented BRILLIANT No. 814

Sensational! New! Colossal!

Yellow freestone ripening during midseason 3 to 4 days earlier than Elberta. The fruit is nearly fuzzless and has a brilliant cardinal red almost completely covering a golden yellow ground color even when growing in shade in the interior of the tree. Fruit throughout the tree is uniformly large even when unpruned or unthinned. Tree is large, vigorous and rapid grower. Self pollinating, it bears tremendous crops year after year. Very hardy in bud and blossom and highly resistant to brown rot. Keeping qualities are excellent.

FOR HOME OR COMMERCIAL ORCHARD
Whether you are going to plant one tree for home fresh eating, canning or freezing or one thousand trees for a commercial orchard, we unhesitatingly recommend Hale Harrison Brilliant as the best peach to plant. It will give you the most satisfaction, or more profit in growing than any other peach known today.

WILL REPLACE ELBERTA
For many decades Elberta has been the standard peach of the world by which all peaches have been judged, tests and observations by leading peach authorities confirm our belief that the new sensational Hale Harrison Brilliant surpasses the Elberta in every way.

OUTSELLS AND OUTBEARS
Hale Harrison Brilliant outsells them all. It is really the one peach. Peaches from these plantings prove it is equally as adaptable to the far south as it is in central and western areas and it even produces highly satisfactorily in Canada and other northern peach sections.

WIDELY ADAPTED
Hale Harrison Brilliant has been planted in forty-two states from coast to coast. This is the one peach that has a high sugar content even when it is hard. Fruit growers have been amazed at its ready to eat coloring and general smooth skin appearance several days before it is ready to pick and ship, this means a long picking season. Records show that it surpasses in keeping qualities any other peach on long distance shipments.

HARRISONS AMAZING GUARANTEE
Several years of testing in co-operation with leading fruit authorities convince us as to the outstanding merits of Hale Harrison Brilliant that we can make the following guarantee.

"Each and every Hale Harrison Brilliant is a true re-production of the original strain, it will produce more satisfaction to you than any other peach variety that ripens during its season, on proper proof of failure to do this we will furnish you an equal number of peach trees of any other variety that you desire."

Back of this guarantee are the resources of Harrison Brothers Nurseries with an enviable record of seventy-two years in the Nursery and Orchard business.

Handsome, Brilliant Almost Fuzzless

3 to 4 feet that has everything. Its beautiful attractive appearance, huge size, superior delicious flavor makes it have extraordinary favorable eye appeal, resulting in higher prices. This combined with its BUMPER crop. "Original tree has produced over twenty bushels a year" make it the outstanding moneymaker.

LONG PICKING SEASON
One of the finest features of Hale Harrison Brilliant is its early coloring, the golden yellow ground color appears weeks before it ripens. This is the one peach that has a high sugar content even when it is hard. Fruit growers have been amazed at its ready to eat coloring and general smooth skin appearance several days before it is ready to pick and ship, this means a long picking season. Records show that it surpasses in keeping qualities any other peach on long distance shipments.

GENUINE HALE HARRISON BRILLIANT PEACH TREES GROWN AND SOLD EXCLUSIVELY BY HARRISON BROTHERS NURSERIES, BERLIN, MARYLAND.
NEWEST VARIETIES’ OF PEACHES

TRUE TO NAME

7 CORONET. Most popular very early ripening peach, CORONET—newest variety cross between Hale Haven and Dixigem. Ripens 3 days earlier than Dixigem and Jerseyland also about 2 weeks ahead of Redhaven. About three-quarters of peach bright, attractive red blush over good yellow background color. Flesh is yellow, firm, smooth texture, good flavor, medium size, nearly freestone. Introduced by U. S. Dept. of Agriculture as ideal variety to plant in future orchards in place of Dixigem.

REDCAP. Very new popular variety just introduced by U.S. Dept. of Agriculture. Cross between Southland and Dixigem. Ripens one or two days earlier than Dixigem, which it resembles. Attractive bright red blush covering three-fourths of medium size, clingstone peach. Flesh is yellow, firm with good flavor. Recommend planting Redcap in place of Dixigem.

7 CARDINAL. New variety, an offspring of Hale Haven, which ripens four days ahead of Dixigem and week earlier than Red Bird. Attractive red blush over good yellow ground color, with smooth skin. Flesh is yellow, firm, clingstone, medium textured and good flavor. About size of Dixigem, also in color, appearance and firmness. New variety just introduced by U.S. Dept. of Agriculture with surprising popularity in the South.

HILAND. New variety cross between Southland, Heice and Hale Haven. Ripens two days earlier than Cardinal, also five days ahead of Dixigem, being eighteen days earlier than Red Haven. Attractively red colored, flesh is yellow, fairly firm, clingstone, medium size, good flavor. Introduced by U.S. Dept. of Agriculture.

TULIP. Very early. New variety originated by Missouri Fruit Experiment Station. Ripens at some time as Dixigem and Red Caps being six weeks earlier than Elberta. Medium to large size nearly round with good red color even before picking time, flesh, yellow, firm, fine texture, excellent flavor, free-stone. Stands shipping well.

SHINN’S DELICIOUS. A true mutation, being very early ripening budsport strain of Burbank July Elberta, U. S. Plant Patent No. 15, discovered by Mr. C. T. Shinn and Mr. L. S. Smith in their orchard near Russellville, Arkansas. Identical in large size, beautiful red color with handsome golden yellow background color, yellow flesh, freestone and superior flavor as its parent. However, its most appealing characteristic is that it ripens three weeks sooner, between Red Bird and Red Haven, making it about five weeks earlier ripening than Elberta. Many growers say it is better than Starking Delicious peach U.S. plant patent No. 506.

RED CREST (N. J. 126). New, attractive, large, firm, yellow, freestone peach. Ripens seven days earlier than Elberta.

M. A. BLAKE (N. J. 117). New midseason peach. Medium to large size, good coloring, firm, yellow, freestone. Ripens four to five days earlier than Elberta.

SUNRISE (N. J. 133). See description on page 8.

GOLDRAY. See description on page 8.

RANGER. See description on page 9.

RED SKIN. See description on page 12.

N. J. 137. Promising, very early ripening, new variety, still to be named. Large size, bright red blush, yellow, ripens between Sunrise and Jerseyland.

KEYSTONE. Just introduced by U.S. Dept. of Agriculture. Cross by Newday and Southland. Ripens between Golden Jubilee and Triomega. Fruit is medium-large size, round, high red color with bright golden background color. Yellow flesh, firm, smooth texture, good flavor, freestone. Trees are vigorous and productive.

This is Your PROTECTION

Every customer is assured of Harrisons’ High-Quality Trees and Plants at all times. Expert growing on proper soils, careful digging and packing is Harrisons’ policy on every order. Every tree and plant we ship is guaranteed to be strictly first class, free from injurious diseases and insects and to reach you in good condition.

Any time trees or plants are received that do not meet these standards they will be replaced free of charge or your money refunded.

Continued growth depends on soil, weather conditions, planting and after care. After ten days it is mutually understood that the nursery stock is satisfactory; however, we will replace nursery stock that dies from unavoidable causes at half price if notified within two months after its arrival.

The World’s Foremost Fruit Variety Identification Specialists Have Examined Harrison-Grown Trees and Pronounced Them True to Name.

NEWEST VARIETIES OF PEACHES
TRUE-TO-NAME

REDGLOBE. New, just introduced by U. S. Dept. of Agriculture. Early mid-season, yellow freestone, medium to large, bright and attractive red color. Firm, fine-textured flesh, good in flavor. Ripens about 16 days earlier than Elberta.

LATROSE (N.J. 109). Late, white, freestone. Large, ripens 10 days later than Elberta. Excellent for homemade canning and freezing. Tree harder than Elberta.

LORING. New, mid-season, cross between Frank and Hale Haven. Introduced by Missouri Experiment Station, Cross Haven. Ripens 10 days earlier than Dollar. Freestone. Ripens 10 days earlier than Hale Haven. Fruit most nearly resembles Golden Jubilee.

ALAR (U.S. Plant Patent 930). New variety recently introduced. Late, yellow, freestone, skin yellow with very high red blush. Pit small. Excellent long distance shipper. Ripens about a week earlier than Rio Jso Gem, which it most nearly resembles. An excellent variety for commercial canning and freezing. 15¢ extra per tree. Available for November 1957 planting.

RICHHAVEN. New variety just introduced by Mr. Stanley Johnston of the South Haven, Michigan Experiment Station. Cross Haven by J. H. Hale and Hale Haven. Ripens 10 days earlier than Redhaven, which it resembles. Peach appears to be ripe a week or ten days before it actually reaches the hard ripe stage. Good shipper. Trees available for November 1957 planting.
Biggest Peach Tree Values in America

HERE'S A "LOAD" OF REASONS WHY HARRISON’S PEACH TREES ARE BETTER

A—Our organization has over 70 years’ experience.
B—Every step in growing under the personal supervision of the Harrison Brothers.
C—Thousands of trees in orchards from which our propagating trees are selected.
D—Use of modern methods for planting, cultivating and digging.
E—Over 1,000 acres of various types of soil.
F—Ideal soil and climatic conditions.
G—Co-operation with leading horticulturists and experimental stations all over the world.

Very Early Varieties

DIXIRED. Very early, yellow, cling, medium size, round, bright attractive red blush; good flavor; prolific bearer. Ripens two weeks earlier than Golden Jubilee or about three days later than Red Bird. A new variety originated and introduced by the U. S. Department of Agriculture. Its most outstanding commercial feature is that it is a good shipper and has been planted extensively in Georgia to meet the demands for the very early Peach market.

DIXIGEM. Early, yellow, semi-freestone, red blush, medium size, good quality. Ripens a few days sooner than Golden Jubilee. A new variety originated and introduced by the U. S. Department of Agriculture. Extensively planted in Georgia.

JERSEYLAND (N. J. 135) — Ripens a week sooner than Golden Jubilee, large, firm, attractive yellow flesh, freestone. Tree is hardy, sets buds freely. Introduced by New Jersey Experiment Station.

ERSYLAND, LARGE. Handsome, large, red, freestone. A new variety.

ERSYLAND, RED. Handsome, medium, red, semi-freestone.

ERSYLAND, RED, FREESTONE. Handsome, large, red, semi-freestone.

THE NEW EARLY RIPENING YELLOW PEACH THAT RIPENS ABOUT 5 DAYS BEFORE GOLDEN JUBILEE

The most promising early ripening yellow freestone peach ever introduced. A cross between Hal-Haven and Kishaven made at the South Haven, Michigan, Experimental Station. Brilliant red color with creamy yellow background, smooth skin, almost fuzzless. Reddens before it ripens. Bears heavy crops and should be thinned for best results. Every grower should try REDHAVEN. We have a good supply of genuine Redhaven trees this season. The demand for this variety is heavy, so order early.

TRIOGEM (N. J. 70)

Developed by the Master Plant Breeders of New Jersey
MEDIUM TO LARGE, FIRM, ATTRACTIVE
Ripens early, medium to large, oval, firm, high quality, high red color over entire Peach, yellow flesh, freestone, smooth, nearly fuzzless like J. H. Hole, one of its parents; colors several days in advance of its ripening, being 2 days later than Golden Jubilee, or 3 weeks earlier than Elberta. This, combined with its very slow rate of softening, makes it an ideal Peach for commercial growers. Hangs well to the tree after the Peaches became firm ripe. When picked hard to firm it is a good long distance shipper. This is the best commercial Peach ripening at this period, and is being planted now by some growers in preference to Golden Jubilee. Considered as the best new variety of Peach so far originated and introduced by the New Jersey plant breeders.

A REAL PROFIT MAKER
TRIOGEM has been fruiting commercially in New Jersey and Maryland for several years. During this time it has topped all varieties in price on the New York and Philadelphian markets which ripen at this time during the summer. Several large commercial orchards have been planted with Triogem and its popularity is increasing each year.

SOUTH HAVEN. Early mid-season, yellow, large, handsome, deep yellow with red cheek, freestone. Peaches of uniform size, delicate in flavor. Ripens 15 to 18 days ahead of Elberta. Trees are very hardy and productive. Adapted to cold climates and produces bumper crops in mild climates.

RARITAN ROSE (N. J. 97). Extremely hardy, white flesh, nearly freestone, large size, high red color with good flavor. Ripens a few days earlier than Golden Jubilee. Excellent peach for home and local market.

GOLDEN JUBILEE. Early—Fruit bright deep yellow, medium to large size, oblong shape. Good size, fine appearance and excellent quality with delicious flavor. Ideal for roadside stands and home orchards, also commercial orchards for nearby city shipments. It ripens about ten days earlier than Hal-Haven.

HERE IS THE HIGHLY FLAVORED EARLY WHITE FREESTONE PEACH YOU HAVE BEEN LOOKING FOR
CUMBERLAND
An outstanding favorite early white Peach. Is a comparatively new, white, nearly freestone variety that was developed by the New Jersey Experiment Station. The fruit resembles Belle of Georgia, both in appearance and quality, although it ripens about the same time or a little before Golden Jubilee.
Elberto doys very size. Few hilly.~MBER strong on Early fancy Freestone, roadside its IS attains one the con
POLLY.

Bigger AT PROFITS real excellent and white Trees will tempera [101 WHILEY.

Hole-Haven.

FAIRHAVEN. Early mid-season, yellow freestone, medium large, nearly round, mostly bright golden in color with an attractive bright red cheek. Skin is smooth and very tough. Fruit very firm and ships exceptionally well. Ripens 7 days after Golden Jubilee.

CHAMPION. A Good Home Peach. White, freestone, very large; creamy white with red cheek, sweet, juicy, very high flavor. Champion has lost its past commercial importance because it will not carry satisfactorily under refrigeration, but as a home garden or a roadside Peach, it is one of the best. Tree is hardy, large grower and productive. Ripens ten days earlier than Elberta.

SUNHIGH. (IN. J. 52.) A large, red, bright, smooth Peach which colors well all over before it ripens, softens slowly, making it a good commercial Peach. Flesh inclines to adhere to the pit when hard ripe. The variety seems to do best in hilly sections and responds well to summer spraying. The fruit is large, roundish, thick-skinned, very uniform in size. Color deep yellow with red cheek. Skin is free. Ripens approximately 18 days before Elberta, at a time to bring high market prices.

HARRY. White. Early midseason. Bears huge crop of fancy Peaches. Freestone, medium size, highly colored and is a very handsome Peach of exceptionally good flavor. Tree is strong grower, very healthy and an extra heavy bearer. Harry resembles Belle of Georgia but ripens about 14 days earlier.

SOUTHLAND. Early midseason, yellow, freestone, medium to large, round, attractive red blush with mild, good flavor. Originated by the U. S. Department of Agriculture. Southland is a deep red yellow peach for the extreme Southern peach Belt. Vigorous tree, productive and fruit ripens at the same time as Harry. Promising commercial peach.

SUMMERCREST. (IN. J. 941.) Midseason, yellow, freestone, large with red blush and sweet flavor. Trees exceptionally vigorous, fruit ripens the same time as Golden, which is a few days earlier than Elberta. Popular in New Jersey where it is known.

GOLDEN EAR. (IN. J. 57.) Early midseason, very large, high red color, yellow, freestone. Very sweet, high red. Ripens 15 days earlier than Elberta. Good roadside market and commercial Peach.

For Greater Profits From Your Land Plant Trees
MIDSEASON—Ripens 2 to 3 days before Elberta.

Original Strain

J. H. HALE

Our "Hales" are propagated direct from the original strain, the variety originated by the late J. H. Hale of South Glastonbury, Connecticut and Fort Valley, Georgia, known as the Peach King of America. There are many types and strains of J. H. Hale grown, but the only one worthy of commercial importance is the original strain, which is the extra large, round, highly colored Peach. The original strain necessitates cross-pollination and it is necessary, for proper results, to plant a few Belle of Georgia or Elberta or Hiley or any other variety of Peaches along with Hale for cross-polllination.

Extra Large Size

Yellow, freestone, extra large, beautiful red coloring, firm and of the highest quality and enticing flavor. J. H. Hale ripens about two or three days prior to Elberta.

HARRISON BROTHERS NURSERIES BERLIN, MARYLAND

J. H. HALE—Giant Size, Enticing Flavor

Belle of Georgia

The Queen of Flavors

THE BEST WHITE MID-SEASON VARIETY

Ripens midseason. Color creamy white with red cheek. Flesh white, red near pit. Size large, freestone. Belle of Georgia, for same time, has been recognized as the best all-around white Peach on the market. It is easily the best shipping white Peach

Early Elberta

Midseason. Yellow, freestone, large, lemon-yellow with a dark cast, blushed with vivid red. Beautiful appearance, high quality, being somewhat similar to Elberta, although a trifle better flavor; rich golden tender flesh, yet firm and has a delightful flavor; excellent for canning. Gleason strain which ripens three days earlier than Elberta.

SULLIVAN EARLY ELBERTA

An Early Ripening Red Bud Sport of Elberta

MIDSEASON YELLOW—FREESTONE

Here is the early ripening strain of original Elberta growers have been wanting. Discovered by Mr. Sullivan in a Georgia orchard. Identical to Genuine Elberta in every characteristic except it ripens about seven days earlier. Yellow freestone, firm, juicy, rich, good flavored. Equally attractive as Elberta and is a good keeper. Good for either home or commercial planting.

10 OUTSTANDING REASONS FOR PLANTING SULLIVAN EARLY ELBERTA

1. Size: Large to Extra Large.
2. Yellow Freestone.
4. Brilliant Red Colored with Golden Yellow Background. Excellent Long Distance Shipper.
5. Tree Vigorous Grower.
6. Bears Large Craps Annually.
7. Ripens a Week Earlier than Elberta.
10. Completely Tested.

Harrisons’ Maryland Grown Peach
Trees are the Finest Quality in World

SULLIVAN EARLY ELBERTA PEACH Popular New Early Midseason Variety
ELBERTA
(ORIGINAL STRAIN)

Internationally Famous—The Standard by Which All Other Peaches are Judged
Mid-season. Yellow, freestone. Fruit is large to extra large, golden yellow with brilliant shades of red, firm, juicy, rich, sweet and good flavor. Elberta has the greatest international reputation of any Peach. It has been the standard for all other Peaches almost since the date of its introduction. The coloring of Elberta is practically perfect. The rich, yellow skin is almost entirely covered with dark red blush upon the sunny side. The attractive appearance and uniform large size serve to sell it almost on sight. We offer original strain trees which is the best strain obtainable.

Save Disappointment—Plant Only Harrison ORIGINAL STRAIN Elberta

Today, there are more than seven distinct types and strains of Elberta, bearing fruit in the orchards of this country. To compare the various sizes, shapes, textures, and red coloring of these Elberta with those grown "on original strain trees", gives sufficient reason why they sold this year at a premium of $1.00 to $2.00 per bushel on the New York and other leading fruit markets.

They Cost No More

Why plant degenerated strains of Elberta when you can plant Harrison's heavy yielding original strain trees. They can be purchased at the lowest price that high quality trees can be produced for. It is true trees, size by size, can be produced cheaper by budding them from non-fruiting trees in the nursery row, but this method causes degeneration. Trees grown in this manner will be lighter croppers and require a longer time in coming into bearing.

FOR NEW LOWER PEACH TREE PRICES SEE PAGE [13]

ELBERTA Original Strain
The Leading Peach America's No. 1 Peach—Elberta. There are more Elberta Peach trees in bearing than any other variety on earth.

REDSKIN. A new variety introduced by the University of Maryland. Mid-season, yellow, freestone, large round, deep red blush, firm flesh, sweet flavor. It is a cross between J. H. Hale and Elberta, which ripens slightly earlier than Elberta. Vigorous, good growing tree and productive.

Brackett
Mid-Season Late

A Profoundly Commercial Variety Slightly Later Than Elberta
Brackett is a comparatively new commercial Peach in some sections but wherever tried it has given uniformly good results. During the past thirty years we have planted many thousands of the variety in but wherever tried it has given uniformly good results.

The fruit is rich yellow, with dark carmine cheek. The size runs fully as large or larger than Elberta. Flesh is deep yellow, extremely juicy and is absolutely freestone. Fruit is much better flavored than Elberta. Good shippers.

Popular On The Markets
Brackett commands unusually high prices on the market and often outsells Elberta twenty-five to fifty cents per bushel. We know the grower who needs a Peach ripening slightly later than Elberta will make no mistake in planting Brackett.

HARRISON'S Original Strain
HARRISON'S were the first to popularize this great variety and distribute it to the fruit growers throughout the country. We offer trees that are propagated direct from the original strain and they are sure to produce results.
Late Ripening Varieties

LATE ELBERTA. (Gemmer's Late Elberta.) Late, yellow, freestone, large, high red color, fine quality, good shipper. Is a typical Elberta in fruit and tree characteristics, but ripens 4 to 5 days later than Elberta of the original strain.

LIZZIE. Late, distinct type of Elberta, very large, freestone, yellow, which ripens 14 to 16 days later than Elberta, having same prominent coloring characteristics as its parent.

HARRISON'S FRESHLY DUG PEACH TREES

PLANT

NOW

PERSONAL SUPERVISION BY G. HALE HARRISON INSURES SUCCESS

73 YEARS LARGEST GROWERS OF HIGH QUALITY TRUE-TO-NAME PEACH TREES IN THE WORLD
ABUNDANCE. Early, large, color pinkish red changing to dark red, with thin bloom. Yellow flesh. Very juicy, sweet and tender, pleasantly aromatic. Hardy, very productive. Adaptable to a wide diversity of soils and climates.

BIG MACKEY. Late. Largest and best Damson, being an improved strain of Shropshire Damson. Freestone. Deep purple, juicy, rich flavor; small stone. Fine for preserving. Easy to grow, produces immense crops. Should be planted in every orchard. Large size fruit makes ideal jams, preserves and jellies. An excellent variety for fresh fruit shipments to city markets, always demanding high prices.

BURLINGTON. Early, about one week after Abundance. Large, cherry-red with thin lilac bloom. Flesh amber-yellow with rich, sugary flavor; high quality and very productive. A product of Burbank; the master plant breeder. Should be in every orchard.

FORMOSA. A midseason variety of excellent and prolific bearing qualities. Large greenish yellow, overlaid with red. Alternate bearer. Heavy crop.

ITALIAN PRUNE (Fellenberg). Late, medium size, freestone, dark purple, delicious. Fine for drying.

GRAND DUKE PRUNE. Late. Commercial variety. Purplish black, juicy, sweet, excellent for cooking.

LOMBARD. Midseason. Medium size, showy purplish red fruit, excellent quality for canning, cooking, preserving or preserving. Prolific cropper.

MONARCH. Very large, bluish purple, juicy, golden green flesh. Bears early and abundantly. Excellent for market.

BBRUCE. Very large, fine early Plum; dark violet-red, juicy and good. Very productive; valuable for market. Quality is excellent, color attractive. Good canner.

METHLEY. A recent introduction which is rapidly gaining popularity due to its fine quality and handsome appearance. The fruit is medium to large in size, reddish purple in color with red flesh. It is juicy, sweet and of distinctive flavor. The tree is vigorous and upright in growth habit. Does well on most types of soil and is a heavy annual bearer.

RED JUNE. Early, medium size, garnet-red color, thin bloom, flesh light yellow, somewhat mealy, sweet, aromatic. Trees are healthy, hardy and productive. An early market Plum.

SATSUMA. Midseason. Best flavored semi-freestone, blood-flesh Plum known. Large size. Flesh dark purplish red, juicy, sweet, possessing an alluring aroma. Originated by Luther Burbank.

SHIRO (Early Gold). Early. Fruit is very large, golden yellow, semi-transparent, covered with bright scarlet-red blush.

SHROPSHIRE DAMSON. Late, medium size, dark purple. Very productive. The best for preserving. The popular old-fashioned Damson variety.

STANLEY PRUNE. Midseason. Freestone, large, new prune variety, outstanding characteristics. Considered best for cooking and fresh fruits.

WICKSON. Midseason. Extra large size, color dark red, thin bloom, flesh amber-yellow, firm, sweet.

YELLOW EGG. Late. Large, golden yellow. Good for cooking. Largest and handsomest of all yellow Plums.

Extra Good Fruits for The Home Garden

APRICOTS

The Apricot is one of the most delightful luscious fruits grown, when eaten fully ripe and fresh from the tree. It is a beautiful, golden, sweet fruit and is not planted more, especially since it ripens just after the early Cherries and before the best early Peaches.

ALEXANDER. Early, prolific, freestone, orange, with red blush; very juicy and sweet flavor. A large, prolific sort that will withstand adverse weather conditions. This variety deserves greater popularity. The best.

EARLY GOLDEN. Pale orange, juicy and sweet. Is a hardy bearer; ripens first of July.

SUPERB. Very good quality. Fruit is beautiful, light salmon colored, best of the older varieties. Tree is large, very thrifty and is extremely productive in fruit.

APRICOTS CAN BE GROWN ANYWHERE PEACHES SUCCEED

NECTARINES

Delicious for Eating

There is a mistaken idea that the Nectarine is a cross between the Peach and something else, while it is really nothing more or less than a smooth-skinned Peach. The melting, juicy texture of the Nectarine and its delicious flavor furnishes many of the most delightful fruits for eating during the summer. Plant a few trees in your home orchard this year.

MONSTER. Large, round, yellow, freestone.

SURE CROP. Very vigorous and productive. The fruits are large, roundish, white and overlaid with very attractive red.

CAVALIER. New mid-season, large, yellow freestone.

GARDEN STATE. Large, firm, yellow freestone.

### WILLIAMS’ EARLY RED

The Big Red Home of Market Apple

Just at the time when people are hungry for a fresh, new red apple, this superb sort comes into market. In New York, Boston, Philadelphia, and other eastern cities as well as middle western and southern cities, the fruit sells as quick as it hits the market-house or dealer’s store. It holds its own anywhere and has proven to be —

The Best Summer Apple

The rich bright red fruit catches the buyer’s eye and is ordered at a price that yields the grower a good profit. Apple is large, with tender, crisp, white flesh, juicy, slightly tart. The trees come to bearing when quite young, producing freely and steadily. Fine for a pollinator or permanent tree, and being hardy, can be successfully grown in New England states and Canada. All orchards should include Williams Early Red. A good pollinator for Red Yorkings and Red Rome Beauty Apple trees.

### SUMMER APPLES

**LARGE TRANSPARENT (Lodi)** You Can Depend on Bumper Crops—Plant Harrisons’ “Bud Selected” Strain

For Larger Qua... Write for Special Prices

**LARGE TRANSPARENT (Lodi)** A New Summer Variety

Ripens Very Early—Destined to Replace the Ever-Popular

We believe there is a big future for this new summer apple. Our commercial friends should lose no time in anticipating the demand for an apple of this type, most widely planted yellow variety.

Somewhat at a dwarf grower, bearing very young, it makes an excellent filler. The skin is a clear yellow, white flesh, of medium size. A good pollinizer.

EARLY APPLE GROWERS MAKE MORE MONEY WITH LARGE TRANSPARENT

Yes, actual profits, that’s what we mean. It can be done—here’s why: Yellow Transparent Apples are always first on the market and generally bring good profits when they attain proper size. Size on Yellow Transparent is hard to get, but easy on its big brother, “Large Transparent,” which ripens at the same time.

Large Transparent Apples Average Up to 1/2 Inch Larger Than Yellow Transparent—This Means $1.00 to $2.00 per Bushel Extra

### OTHER SUMMER APPLES

**STARR.** Large, attractive with bright yellowish smooth skin; sometimes marked with a faint blush and numerous rust-colored dots; flesh yellow, fine, very tender, crisp, juicy, aromatic and very good flavor. Relatively good keeper. Old variety most extensively planted in North. Tree is very hardy, withstands unusually cold climates, vigorous, fruits at early age, bears regular and abundant crops. Tree somewhat dwarf, making a fine filler.

**EARLY MCINTOSH.** Reminds its McIntosh parent in appearance, but is less aromatic. An attractive, uniform red color, good size, flesh white, tender, and juicy. The trees are vigorous, healthy, productive, and bear annually it thinned early and severely. The shape and framework of the tree, especially the heavily-budded branches, are like those of McIntosh. The crop ripens ten days later than that of Yellow Transparent. The fine flavor is similar to that of famous McIntosh Red

**RED SUMMER RAMBO.** A new earlier coloring solid red strain means much greater profits for growers everywhere.

**SUMMER RAMBO.** Large, rippled with red.

**EARLY RED DUCHESS.** Highly colored early apples bring premium prices. This bud sport colors red all over early in the summer. Excellent pollinator for Red Gravenstein.

**YELLOW TRANSPARENT.** Medium size greenish yellow, very heavy

**RED GRAVENSTEIN.** Selected description page 19. Excellent summer apple.

To Make One Tree Do the Work of Two, Plant Harrisons’ Bud-Selected, Heavy-Bearing Strains.

[16]
BRILLIANT RED DELICIOUS
Newest "Red Bud Sport"

The apples start taking on red color during early August or the middle of August, depending on the section of the United States that the tree will be planted.

The solid red coloring at maturity is excellent and attractive, being a big improvement over the Richared, which it resembles in size and shape.

RED SUMMER RAMBO

BIG YIELD STRAIN

A new "Red Bud Sport" strain which has very early red coloring during July and develops into a solid red colored apple. Extra large size fruits with a rich mild flavor. A tremendous bearer.

A customer in Virginia picked 1,184 bushels per acre.

A very profitable and excellent summer apple. Harrison's strain, being this new solid red color sport, is so superior in appearance to any of its kin that in the future its culture alone should be recommended. Large, very vigorous growing hardy trees.

SPARTAN

A very attractive McIntosh type apple maturing about one week later. Filmer flesh and has excellent dessert quality. Keeps in storage several weeks longer.

Spartan is a cross between McIntosh and Albermarle Pippin (Yellow Newtown). Tree is a good grower and produces bumper crops.

Apple growers in British Columbia, Canada, consider Spartan as one of the finest apples grown and eventually expect Spartan to replace McIntosh.

NERO

Late September, deep red, handsome shading, medium size, of good quality and excellent flavor. One of the longest keepers. Extra-heavy bearer.

NEW LOWER APPLE TREE PRICES ON PAGE 16.

BRIGHT RED

Stayman 201 Type

It's Flaming Solid Red

BRILLIANT RED STAYMAN

New red bud sport with attractive, bright brilliant, solid red color all over the apple ten to twenty days earlier than Stayman Winesap. With 100% red color it is possible to pick and ship two weeks earlier than normal.

YORK IMPERIAL

A large red apple, a little lopsided, but keeps all winter. A heavy bearer and good quality.

AUGUST RED DELICIOUS

Newest Early "Red Bud Sport"

The red color starts to show on apples during late July or early August, depending on the section of United States that the tree will be planted.

It has good full bright red color during the summer. The new variety has a much better red coloring than Starking Delicious, which it resembles in shape and size.

Similar to Red King Delicious. A good growing tree. Fruit has excellent flavor. 25¢ extra per tree. One year budded trees are available for Spring 1958 planting.

JERSEYRED (N.J. 1)

Late attractive-red apple producing extra large fruits. Very firm and stores exceptionally well, as does Red Rome Beauty. A cross between Gallia Beauty and White Winter Pearsmain. One year trees available for November 1958 planting.

NEW BRIGHTER
Bear Giant Size, Rich Colored, Fine

A HORTICULTURAL TRIUMPH—UNEXCELLED FOR

TRIPLE RED DELICIOUS—THE BEST
King of All Red Apples
Solid bright red color month earlier than the original Red Delicious. Has all the fine qualities of famous parent strain. Plant Harrisons' Triple Red Delicious to insure your future financial income.

AMERICA'S HIGHEST PRICE APPLE
EXCELLENT FLAVOR

Budded Apple Trees are Far Superior to Grafted Apple Trees

2. Some as Parent in Flavor, Quality, Productiveness.
4. Produce Highest Percentage Fancy Fruit.
5. Tests Show They Come Into Bearing Sooner.
7. Completely Tested.
8. Excelled by No Other Red Bud Sports or Strains.
10. Greatest Profits.

SCARLET RED STAYMAN BRILLIANT COLOR
We offer to the public the greatest strain of Stayman Winesap ever discovered. It is a true bud sport found in a Stayman Winesap orchard. Scarlet Red Stayman takes an bright red color weeks earlier than ordinary Stayman. Its ripening date is the same but can be picked earlier if desired.

A Ready Market at Top Prices
Scarlet Red Stayman is the best general purpose Apple for planting in the East. Its solid scarlet-red color and its bright attractive finish causes it to command highest market prices. The fruit is large and it produces bumper crops each year.

FOR JUMBO APPLE TREES SEE PAGE 21

SOLID RED WINESAP Old Winesap generally has plenty of color when planted in most sections, but for those growers who want a more solid red-colored Winesap, we recommend our new strain.

THE APPALACHIAN WINNER RED YORKING
(U. S. Plant Patent No. 125)
The Red Yanking is a "bud sport", being a mutation of the famous York Imperial. This "bud sport" originated on a tree, grown with other York Imperial trees, in Harrisons' Nurseries and later sold to Mr. W. H. Allison, near Shipensburg, Penna., for use in planting a large orchard about 40 years ago.

PLANT BIG TREES for QUICKEST and BEST RESULTS

Superior to all Other Tested Strains

RED YORKING—Big Crops
RED VARIETIES
Flavored Apples
HOME OR COMMERCIAL ORCHARDS

RED ROME BEAUTY
An improved Rome Beauty, identical in vigor and production. Color of fruit much brighter and solid red. Produces much higher percentage of fancy Apples and also superior in quality to the ordinary strain of Rome Beauty. Red Rome Beauty is renowned for bearing at a very early age, producing bumper crops of large size Apples. The tree is a vigorous, strong grower, exceeding-ly hardy. Pacific Coast strain. Has always been very popular.

NEW STRAINS OF RED ROME
Can supply two new additional red bud sport strains known as C. and O. Red Rome also C. and O. Red Rome number 262.

SUPER RED McINTOSH
A new strain of McIntosh Red that starts coloring earlier and produces a larger percentage of extra fancy fruits. Super-Red McIntosh, when allowed to mature on the trees, is slightly darker in color than our regular improved McIntosh Red. Has all the best qualities of ordinary McIntosh and will mean larger profits for growers who have been unable to get sufficient color. McIntosh has been the favorite in the North; this new strain extends the planting area farther South. The most highly colored solid red strain available, regardless of price. We have some exceptionally good one-year trees and fine two-year trees to offer this season. McIntosh strain of Apples for big profits, equally as good in home orchards as it is commercially.

RED SPY—Beau Crisp, Juicy Apples

A new “bud sport” from New England. Identical with the ordinary Northern Spy in fruiting habit. Extra large size fruit, strong, vigorous, hardy trees. Comes into bearing earlier than the ordinary strain. Colors early, nearly every Apple being solid red in color. We recommend it for commercial and home plantings in northern states.

BRIGHT RED JONATHAN
We searched the country over to find a strain of Jonathan that had more color than our selected Big Yield Strain of Jonathan. After thousands of miles of travel inspecting all of the new strains of this famous variety we found the one we had been looking for. It colors solid red several days earlier, otherwise it is identical with ordinary Jonathan. Growers who want more, deeper colored apples will find our Bright Red Jonathan the best colored strain obtainable.

RED GRAVENSTEIN
Here is the Apple that has been overlooked by eastern growers. Old-fashioned Gravensteins have been grown in tremendous volume during the past twenty-five years, mostly in California, a few in the Eastern States. The old strain lacks the color to make it sell. Our new Red Gravenstein colors a solid bright red long before it is ripe. The quality of Gravenstein is extra good for an early Apple and its ability to carry to distant markets, even after it gets solid red, makes it command the highest prices.
**GRIMES GOLDEN**

**Harrisons' Selected "Big Yield" Strain—Best Home Orchard Apple**

Autumn, medium sized, golden yellow tender, rich aromatic, sub-acid, delicious, possibly the best flavored Apple known and a good keeper. No better variety exists that can carry the fruiting tree and bring it in early. One of the two or three best known, producing large crops annually. Excellent variety, this tree comes into bearing early. Grimes Golden is the best pollinator known, especially for Stayman Winesap, Lady Baldwin, Cortland, Rome, Russet McNicoll and others. Be sure to include Grimes Golden in your orchard. **THE EASIEST TO GROW.**

**YELLOW DELICIOUS**

It's Golden!

A golden yellow Apple with decided "Delicious" characteristics. Yellow Delicious has a common name, but a distinctive flavor, and is most popular for eating during the fall and winter months. Late September and January finds it at its best. Many people think it superior to the famous Delicious. **The A Prolific Cropper at an Early Age**

The Yellow Delicious tree is very thrifty, hardy, and a vigorous grower. It is renowned for its heavy bearing of fruit at a very early age. You can count on a good yield of ripened fruit each year. Excellent pollinzer for all varieties.

**STAYMAN WINESAP**

Big Yield Strain. Without doubt the heaviest yielding strain of Stayman Winesap obtainable! This strain yields bumper crops year after year. It comes in a good bright red and gets nearly solid red colored when allowed to stay on tree until fall ripen. This is an improved strain and is preferred by many growers in the East. Tested on time-proven by thousands of growers.

**McINTOSH RED**

Improved Type—Heavy Yielding Strain Preferred by Many Growers in the North.

Until the discovery of our New Super Red McIntosh our improved McIntosh Red was the best strain of McIntosh available. It colors red when climate and soil conditions allow it to remain on the trees until it is mature. This heavy yielding strain is much superior to any strain of McIntosh, especially the dull stripped. Our new variety results from crossing (Mcintosh Red and Ben Davis). It is a vigorous tree, easy to handle, and produces bumper crops each year. Generaly considered as the best flavored Apple grown. Recommended for home or commercial orchard plantings.

**OTHER GOOD APPLES**

**SMOKEHOUSE**

Large Apples of supreme flavor, excellent for eating, yellowish green matted with dull red and with many russet dots; flesh firm, crisp, juicy and aromatic. Tree large, vigorous and definitely productive.

**WINESAP**

An Apple favorite in Virginia. Sometimes called Old Winesap and Virginia Winesap. Medium size, oblong, smooth, and a fine dark red—one of the best red colored Apples grown; flesh yellow, crisp, tender, very juicy, aromatic. Extremely excellent flavor. Very long keeper and considered the best cold storage variety; keeping until July. Strong grower; comes into bearing early. Our strain produces bumper crops of the larger sized Apples with plenty of color.

**MAMMOTH BLACK TWIG (Paragon)**

Extra large in size and round; skin smooth, yellowish covered with deep red; the general effect being dark red; flesh tender, tinged with yellow, crisp, sub-acid, aromatic, fine flavor of excellent quality, long keeper of great value. An important commercial variety in the East. Tree is vigorous and healthy, yields big crops. Plant Delicious or Jonathan as a pollinator.

**NORTHERN GREENING**

Large, round, greenish yellow; firm, good quality, bleded keeper. Sips well. Attractive apple when packed in baskets, demands good prices, excellent baking Apple. Should not be planted extensively because crops are not so certain due to blossoming early. Trees are extremely hard, vigorous, and bear very young.

**RHODE ISLAND GREENING**

The Popular Northern Apple. Large, greenish yellow; flesh crisp, juicy, quite acid, firm, fine granulated, tender, and of very fine flavor and quality. An excellent keeper, a popular barrel Apple, brings good prices. Generally planted in New England, New York, Michigan and Canada, but not advisable to plant south of the Mason-Dixon line.

**ROMA BEAUTY**

Large, round, red, flavor and quality above average.

**RED LOWRY**

Red bud sport strain, identical with its parent Lowry in all respects with the exception that it has much more very red color and when matured full red color. It can be picked 2 to 3 weeks earlier than Lowry due to its earliness in season and color. Interplant a few Grimes Golden as a polliner.

**DWARF FRUIT TREES**

Take Little Space to Produce Big Delicious Fruit

**DWARF APPLES**

These little trees can be planted 8 to 10 feet apart, and are only 10 to 12 feet high at maturity. Most varieties start producing fruit the first or second year after planting, and the fruit is as large or larger than from standard trees. Plant two or more varieties for pollination.

Varieties: Large Transparent Green Delicious Mcintosh Red Red Rome Beauty

Price: 2-yr., 3-4 ft., $3.25 each; 3 for $9.00.

SWEET CHERRIES

What fruit is more pleasing than the Sweet Cherry? The ideal fruit to plant in the back yard. We have a good supply of first-class trees in the following varieties.

GING. Very large, dark brown, flesh firm, sweet. Midseason.

BLACK TARTARIAN. Very large, sweet, purplish black color, juicy, rich flavor, heavy bearer and most profitable sweet variety grown. Early.

GOVERNOR WOOD. Large, light yellow, marked with red, sweet flavor.

LAMBERT. Extra large, sweet, jet black, very popular. Midseason.

NAPOLEON. (Royal Ann) Large, pale yellow, bright red cheek, sweet, excellent flavor, prolific bearer. Midseason.

SENCEA. Resembles Black Tartarian, but ripens two weeks earlier, rich sweet flavor.

SCHMIDT. Schmidt's Bigarreau. Large, sweet, deep black, tender, fine flavor. Midseason.

EMPEROR FRANCIS. Large, high quality, resembles Napoleon.

YELLOW SPANISH. Large, sweet; yellow with red tinge. One of the most beautiful and popular of the light-colored Cherries. Heavy bearer. Midseason.

HANSEN'S IMPROVED Bush Cherry

An ornamental shrub producing delicious fruit. Very easy to grow, highly productive and hardy. The fruit is large, black and sweet, wonderful to eat right from the bush. Introduced by Dr. Hansen of the South Dakota Experimental Station. Leaves are silvery green, turning to red in autumn. Attractive white blossoms add to landscape effect

3-Year Bushes, Bearing Size, $1.00 each; 10 for $9.00.

[22]
Fancy Bartlett Pears

1—Superb Quality
2—Heavy Cropper
3—For Home or Commercial Grower
4—For Eating and Canning
5—Bear Early
6—A Harrison Brothers Speciality

For home, for canning, for market, the best. Ripens during summer.

A golden colored Pear, with a red cheek on most specimens. Bartlett mellows and is excellent for eating very early in the fall, yet when picked a week before it is ripe, and properly stored, will keep till late. Flavor delicious and musky; flesh buttery, rich and juicy. One of the finest Pears that grows, to eat raw. A mingling of the flavor of Eartlett Pear and Quince gives about the finest taste of any food this world's folks have. Bartlett trees bear early, produce enormous crop, and are not nearly so subject to damage by insects and disease as some other sorts. The trees do especially well with high culture.

Fancy Bartletts Bring Highest Prices

Bartlett Pears always sell on the markets even when other sorts are not in great demand. The fruit is so handsome and appealing that it pays to pack it in fancy containers. Baskets or bushel boxes are best adopted. The fruit ought to be sorted and graded, wrapped in tissue paper, and arranged in the container practically the same way that you pack Apples. Pears are sometimes packed in Peach carriers, and sell to good advantage. Plain fruit can be sold without wrapping, in small baskets or boxes.

One or two Bartlett Pear trees in the city yard will furnish a considerable amount of fruit; a half dozen will supply the family with fresh fruit and a surplus for preserving.

KIEFFER

SURE CROPPER—EASY TO GROW

Of all the Pears, Kieffer is the most easily grown. Trees are vigorous, exceptionally hardy and thrive on varied soils in any climate. Kieffer and Kooence are the only Pears that can be successfully grown in such southern states as Alabama, Mississippi, Louisiana, etc., and yet it is the leading commercial Pear in Canada. Kieffer is blight-resistant, and can be successfully planted in large orchards.

This fruit is large to very large size; skin yellow, with light vermillion cheek; flesh yellowish white, very juicy. Noted for being a long time keeper. Most popular conning Pear.

BEURRE BOSC. Large size, fine quality, brings highest market price. Late.

BEURRE D'ANJOU. Large, green in color, somewhat yellow when ripe, buttery, melting, rich, vinous, good flavor. Tree vigorous, hardy, prolific bearer. Very late.

CLAPP'S FAVORITE. Large size, hardy and very productive. Thrives where other varieties fail. Very early.

DOUGLAS. Very resistant to blight. A winter Pear of wonderful quality, golden yellow with a faint blush on the cheek. Bears early.

DUCHESS. Very large, dull greenish yellow. Tree somewhat dwarf but a dependable bearer. Late.

KOONCE. One of the earliest Pears, free from blight, does not rot at the core like many early Pears. Fruit is yellow, medium to large, delightful flavor. Very productive. Extra good for southern states.

SECKEL. A beautiful and delicious little Pear. One of the richest and highest flavored Pears grown. Tree dwarf, bears prolific crops. Late.

WORDEN SECKEL. A seedling of Seckel. Superior in size and color. Mid-season.

Five Varieties of Apples for Fresh Eating from Late June Until Early November produced on the same tree

Here’s the opportunity for those with limited space to have five mighty desirable varieties of Apples, all budded on one tree for a little more than the cost of one tree. Requires only 20 ft. space when fully grown. Each tree is budded to Large Transparent for first summer variety, Williams Early Red, Red Cravensteins, Triple Red Delicious and Yellow Delicious for autumn varieties, Scarlet Red Stayman and Red Rome Beauty for winter varieties.

Budded to 7 varieties, however, guaranteed to have 5 or more.

2 year, 4 to 5 feet, well branched at $3.25 each.

2 year, 5 to 6 feet, extra well branched with good heads, at $4.50 each.

Jumbo Size, 3 year, 6 to 8 feet, extra well and heavily branched with beautiful heads at $5.40 each.

Fruit Trees are To Large for Parcel Post Shipment. We Recommend Express.

New Gigantic Red MacDonald Rhubarb

If you want something different, something delicious in garden fruits, then plant some of this grand new MacDonald Rhubarb.

Stalks are of giant size on mature plants, and a rich rosy red in color. This beautiful color carries through the stalk. Sauce made from it has the red color of a dish of Strawberries. Flavor is mild and pleasing. This new Rhubarb does not send up seed stalks and never becomes tough or stringy. Just cut in small chunks and cook. Do not remove the tender skin; it cooks right up with the stalk.

Heavy plants: $1.00 each; 6 for $5.40.

NEW GIANT Cultivated
Blueberries
- Profitable to Grow
- Delicious Berries
- Very Ornamental

Once Planted Lasts a Lifetime
Blueberries are not only the largest money makers of all time commercially, but are also one of the easiest fruits to grow. The berries bring up to 75¢ per quart—$400.00 per acre the third year. They are exquisite and delicious, and bring highest prices on the market. The demand for Blueberries is practically unlimited. A planting lasts a lifetime with proper care and the plants will pay for themselves their first crop. A few bushes planted in the shrub border and in the garden will be sufficient to supply you with berries for years.

Blueberries—Easy to Grow
Set the bushes 5 by 7 feet apart in moist, acid soil. If your soil is sweet, it may be made acid by mixing with it a little quantity of acid peat, rotted leaves and pine needles, or similar material. Fruit ripens over a period of several weeks. Plant two or more varieties so as to insure proper pollination.

Very Ornamental
As an ornamental shrub the Blueberry cannot be surpassed. Full of lovely pink blooms, which open to bell-shaped, white flowers in June. Plants are compact, low growing, having waxy green leaves which turn red during the fall. Twigs are reddish brown and very showy during the winter.

SPECIAL JUMBO SIZE BLUEBERRY PLANTS
Have already fruited in the nursery. Ready to bear big crops of luscious berries on your ground. As easy as grown as a shrub or Rose bush. You can pick delicious berries the first season planted, and each year they will produce a larger crop with very little attention. We only have a few hundred of these Jumbo sized plants to offer. Can supply in the following varieties only: June, Rancocas, Concord, Stanley, Rubel, and Jersey.

Prices: Jumbo size 4-year-old, 2 to 3 ft., $2.50 each; 3 for $6.75; 10 for $20.00

LEADING BLUEBERRIES

- **JUNE.** Plants seldom exceed three feet in height and make a broad, low bush. The color of the new growth in winter is a light red over olive. The large berries have a delicious sub-acid flavor.

- **RANCOCAS.** The bush of slender, vigorous, upright habit rarely surpasses five feet in height. The winter twigs are a dark red. The berries are somewhat larger than those of Rubel and begin to ripen several days earlier.

- **CONCORD.** The bush is of upright habit and at maturity exceeds six feet in height. The young growth is bright red in winter. The berries are large, frequently reaching three-quarters of an inch in diameter. They usually ripen a few days earlier than Rubel and are fine in flavor and appearance.

- **STANLEY.** Tall, vigorous bush with large, thick, shiny leaves. Good producer of large berries, considered best flavored of all varieties.

- **RUBEL.** A vigorous, productive variety. Well developed bushes stand six feet high and the winter color of the young wood is a rich red. The large berries of fine color are usually ready to pick the first week in July. Best commercial variety.

- **JERSEY.** The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over golden brown. The berries are the largest of any here listed, light blue, and ripen about the same time as Rubel.
Grow Finer Flavored Berries
With Harrisons' Select Certified Raspberry Plants

LATHAM
WORLD'S LEADING RASPBERRY

The sensational yields of this variety have attracted the attention of growers everywhere, and all those who have given it a trial are praising the many unusual features they have found in Latham. After thoroughly testing Latham we find it a remarkable variety in every respect you will be both delighted and surprised after giving it a trial.

Large Berries—
Tremendously Productive

Latham is a tall, vigorous grower, the canes are extra heavy, well able to support the load of fruit. The foliage is healthy, dark green, tough and leathery, highly resistant to insects. Latham ripens with Cuthbert, covers a longer fruiting season. The berries are beauties and will cause a sensation wherever they are shown. Many are over an inch in diameter and they hold this size to the end of the season. Color dark, rich red.

A Blue Ribbon Winner for the Home and Commercial Grower. It simply cannot be equalled.

Every Garden Should Have
INDIAN SUMMER
Sensational New Everbearing Raspberry

A dish of big red juicy Raspberries sprinkled with sugar and swimming in pure cream, it can be yours for every meal from June into July, and again from mid-September until frost, if you will plant Indian Summer. Makes tasty, scarlet-red sauce or pie and the finest jams and preserves you ever tasted. Frozen Indian Summer Raspberries is like having them fresh from your garden the year round.

Indian Summer Raspberries are no experiment; they have fruited successfully for thousands of gardeners in nearly every section of the country. This is truly a champion for your garden. Order early.

The Most Popular
CUMBERLAND

Black Raspberry

Midseason to late. This is the most popular Blackcap of the present time, because of its great size, firmness, and productiveness. The fruit is the largest of the Raspberry family, and is of such handsome appearance that it is sure to bring the top prices on the market.

A BIG CROP EVERY YEAR

Cumberland has never been known to fail to produce a big crop every year. This variety is perfectly hardy and tremendously productive, the bushes are vigorous, upright and healthy. Berries are glossy black in color, not equalled by any other variety in quality, flavor and appearance. It's good to eat and good to sell.

Here's Another Extra Good Blackcap
The Mammoth New MORRISON

This brand new variety has been a sensation wherever planted. Mammoth sized berries, glistening jet-black color, rich flavor, fewer seeds, heavy producer. The thrifty, strong, hardy plants are heavily rooted and disease resistant. Easy to grow, excellent for canning, eating fresh, freezing. Ripens slightly later than Cumberland.

Increase Your Profits With

[1261]
EBONY KING BLACKBERRY

A Heavy Yielding Blackberry that Spells Success Everywhere

The sensational New super-bearing Blackberry that is proving superior to most varieties because of its ability to bear consistent heavy crops and the fact that non-bearing plants are at once distinguishable and can be removed if necessary. Abductive blossom blight is present in most of our fine old types making them worthless in many cases. Ebony King is among the very best we have observed and we are glad to offer a really good blackberry to our customers. Berries are large, glossy-black, very high dessert quality, suitable for processors, home use or fresh fruit markets. Plants are very thrifty and hardy. Fruit ripens early. If you want a real heavy producing, upright Blackberry be sure and plant Ebony King this year. 6 for $2.00; 12 for $3.85; 25 for $7.40; 50 for $14.00; 100 for $22.50; 250 for $54.00.

NEW the Sensational
Boysenberry

The New Mammoth Berry That Will Revolutionize the Berry-Growing Industry

Two Inches in Length

NEW LOWER PRICES

The new Boysenberry is truly a glorified Youngberry. We offer it again this year because of the tremendous large size of the berries; because of its very prolific fruiting; and lastly, because we think that it has the highest qualities of all bramble fruits.

They are just as easy to grow as Blackberries. They produce a larger crop, not because there are more berries, but because each berry is so much larger. Has a rich, tangy flavor all its own.

No. 1 plants: 3 for $1.35; 6 for $2.15; 12 for $3.15; 25 for $4.95; 50 for $8.55; 100 for $14.85; 250 for $32.00; 500 for $51.75; 750 for $70.85; 1000 for $90.00.

Lucretia Dewberry

Long, mammoth block berries, recognized as the leading variety. Incomparably better in every way than any Blackberry you have ever seen or tasted. Lucretia is a very early bearer, ripening from a week to ten days before even the earliest Blackberries. Big, uniform size makes them top-notchers in price on any market. For real profits and for home and commercial growing, Lucretia is the only variety of importance.

No. 1 plants: 6 for $1.70; 12 for $2.45; 25 for $3.90; 50 for $6.65; 100 for $11.55; 250 for $24.95.

CURRENTS

NEW RED LAKE. Biggest, sweetest, finest improved Red Currant on the market. Large bunches, produced in profusion. Extra hardy.

WILDER. One of the strongest growers and most productive. Bunch and berry large, bright, attractive red color. Large, 1-yr. bunches, $1.00 each; 3 for $2.85; 6 for $5.40; 10 for $8.00.
NEWEST VARIETIES

"VIRUS-FREE" PLANTS

POCAHONTAS—(Early)
A new introduction of the U. S. D. A. A large, deep red berry is produced from the exceptionally vigorous plants. Highly flavored. A leader due to its strength and productiveness.

DIXIELAND—(Early)
A new introduction of the North Carolina Agricultural Experiment Station. The vigorous growing plants have a strong color and produce berries considerably larger and much firmer than Blakemore. Berries are very uniform in shape and ripen about the same time as Blakemore. Truly an excellent shipper and the best to date for freezing.

STELEMASTER—(Early)
One of the latest introductions of the U. S. D. A., Beltsville, Md. Because of its resistance to all races of "Red Stele" now known in the Eastern United States. The champion of all in this respect. Ripens about the same time as Blakemore. Berries are uniform, smooth, and of good size. Flesh is light red, juicy, and firm, with flavor mildly sub-acid.

ROBINSON—(Midseason)
Ripens just after Premier, at a time when berries bring a good price. Berries are large, brilliant red, uniform in size. Vigorous grower and a heavy yielder.

SPARKLE—(Midseason)
A vigorous grower and very productive. Berries are somewhat round in shape, of excellent quality and splendid for freezing.

ARMORE—(Midseason)
Introduced by the Missouri Experimental Station, this variety has proved more productive than 60 others in actual test. Berries are of good size, a beautiful red and of excellent flavor; a firm, good keeping, good shipping variety.

VERMILION—(Midseason)
Introduced by the University of Illinois. Very productive, of good size berries; fine quality.

Plants referred to as "virus-free" on this page have been field-grown from virus-free foundation stock furnished by U. S. D. A. Plants have been dusted with parathion to control aphids which transmit the virus disease. Since virus does not produce clear-cut symptoms in most strawberry varieties but simply weaken and devitalize the plants, no guarantee can be made that these plants are 100% free of virus. Because of the measures that have been taken to protect these plants from virus infection, believe them to be substantially virus-free.

Dependable-Hardy-True-to-Name

Harrisons' Selected Strain "Big Yield" Strawberry Plants Are Better

WELL-KNOWN STANDARD VARIETIES

FAIRFAX, Early
The Sugar-Saving Berry

Color is a deep, full red, its rich, sweet flavor brings buyers back for more. Fairfax berries are exceptionally firm, making it an ideal shipper. Superior to all for home use, equal to any for commercial planting.

CATSKILL—Midseason
A midseason berry that will produce the largest crops of bigger berries of any midseason variety. Catskill is entirely satisfactory as to firmness, quality, and attractiveness, season of ripening and climatic adaptability. The highest record of marketable berries was made with this variety. In shipping respects it ranks with Chesapeake and Lulton. It is rated equally as attractive as Fairfax or Dorsett. The berries are borne on rather long fruiting stems which makes it easier to get at in picking.

"VIRUS-FREE" STRAWBERRY

GARDEN OFFER

No. 28

25 BLAKEMORE 25 ROBINSON
25 PREMIER 25 RED STAR
ALL FOR $3.75

This is the other new one by the U. S. D. A. and a cross between the Chesapeake and Fairfax. This is the late one. Berries are large, and are borne on short, stout stems that stay well under the leaves, thus protecting them from late frosts. Makes a good fruiting row, and plenty of money can be made from growing this one, as late berries always bring a high price.
Pick World's Finest Strawberries

IT PAYS TO PLANT OUR SELECTED“BIG YIELD” STRAINS
SUPERFECTION—EVERBEARING
This exceptionally large, round, red to the center berry, has a sweet, pleasing, mellow flavor and is delicious to eat fresh, canned, preserved in jams and jellies, as well as fresh frozen. Bears an abundance of large berries throughout the late summer and fall season.

A TRIPLE YIELD
1. Plant this spring
2. Pick first crop, July to frost.
3. Pick second crop, June next year.
4. Pick third crop, August to frost next year.

3 REAL CROPS—3 BIG PROFITS
Bears in 90 Days, and, too, It's the Best Family Garden Strawberry—Loads of Big Berries in 90 Days

DRASTIC SCARCITY OF STRAWBERRY PLANTS FOR SPRING 1958
Reason due to reduced acreage and the severe drought during the growing season of 1957.
The Del-Mar-Va Peninsula grows more strawberry plants than any other nursery area in the United States.

A Big Profit From Your Own Back Yard
Everybody prefers the flavor of vine-ripened Strawberries. They are more delicious and usually sell for 10c to 25c per quart. Customers pay premium prices for garden fresh Strawberries and small growers make real money, up to $500.00 per acre.

Whether you have a small garden or several acres, you can make a big extra cash income by planting Harrisons' "Big Yield" Strawberries. Others are doing it, why not you. It costs only a few dollars to get started.

TEMPLE (MIDSEASON)
Bred for heavy yields and resistance to disease. Named after Prof. C. E. Temple of the University of Maryland, whose efforts started the work of cross-breeding Strawberries for disease resistance. Temple is not only a heavy yielder of fine looking berries, but they are of the highest quality and are suitable either for home or commercial production. One of the easier varieties to grow, as it thrives on soil that is too wet for other kinds.

BIG JOE The Old Reliable Midseason Variety
LARGE YIELD—FANCY FRUIT FINE FLAVOR
Big Joe is a heavy producer of large, brilliant red berries of extra fine flavor and is firm enough to withstand long shipments. The plants are good growers and heavy yielders. This variety succeeds on all types of soil but does extra well with good care and fertility. Be sure to include Big Joe in your planting this spring. Our big yield strain insures big crops.

FAIRPEAKE The Favorite Late Berry
It is a good producer of very large berries that hold their shape well until the end of the season. It does not yield as many berries per acre as some of the early varieties, but the size and quality of its fruit enables it to sell for a much higher price which offsets this disadvantage. The berries are firm enough to ship to distant markets and to arrive in first-class condition. An exceedingly valuable commercial berry but not exactly adapted for home planting. We offer a selected "Big Yield" strain.

HARRISON'S BIG YIELD GRAPE VINES

BETTER 
BEAR BETTER CROPS 
OF BETTER FRUIT

Harrison Brothers Selected Varieties Grapes

CACO. Red. Midseason. Fruit is very large and handsome. A rich wine-red color. Not a very rank grower and a shy bearer.

FREDONIA. Blue. Very early. Originated by New York Experimental Station. The bunch and berry are large, with excellent, juicy, delicious flavor. Vigorous and productive. Ripens fully ten days before Moore's Early.

NIAGARA. White. Midseason. Best of the standard light colored Grapes. Bunches of large greenish white berries change to pale yellow when fully ripe. A rank grower and very productive. Popular with vineyardists and home gardeners in the North, as well as the South.

WORDEN. Blue. This excellent Grape is as hardy, healthy, vigorous and productive as Concord, of which it is a seedling, but better in quality. It is sweeter, larger in bunch and berry. Several days earlier. Valuable for garden and vineyard.

CONCORD
Harrisons' Super Strain

Blue, midseason. The most popular and extensively planted Grapes in America. It adapts itself to varying conditions and is grown in most every state in the union. Large, compact bunches of dark purplish black colored berries. The berries are covered with a rich bloom, skin is tender, but is sufficiently firm to carry to distant markets; flesh is juicy, sweet and tender.

PLANT 1 TO 2 FEET APART
HYDRANGEA PEE GEE

CREPE MYRTLE (Lagerstroemia indica). Small green, glossy leaves; very beautiful showy flowers during midsummer to fall; noticeable object in any landscape. Not hardy north of Mason-Dixon line but most popular southern shrub. Pink and red varieties. 11/2 to 2 ft., $1.50 each.

QUINCE, FLOWERING (Cydonia Japonica). Scarlet flowers in April and May. Do not doubt one of the most attractive spring blooming shrubs. 1 to 1 1/2 ft., $1.00 each.

SPIREA ANTHONY WATERER. Crimson flowers in large, flat clusters. Blooms early and continues till fall. 15 to 18 inches. $1.00 each.

WEIGELA, EVA RATHEE. Very attractive deep carmine-red flowers, making a very showy shrub. 11/2 to 2 ft., $1.00 each; 2 to 3 ft., $1.25 each.

BEAUTY BUSH. Pink tubular flowers, heavy bloomer. 2 to 3 ft., $1.25 each.

HYDRANGEA PEE GEE (Hydrangea Paniculata Grandiflora). Large flowers; first snowy white, then pink, changing to reddish bronze in the fall. Blooms mid-summer to fall. 18 to 24 inches. $1.00 each.

DEUTZIA, PRIDE OF ROCHESTER

ALTHEA or ROSE OF SHARON (Hibiscus Syriacus). The double and single flowers are formed in varying colors. We can supply double red, white with crimson center, and double white.

BUDDLEIA MAGNIFICA. New and undoubtably the finest of all the summer-flowering Butterfly bushes. Large bright lavender panicles. Flowers do not sunburn as do other varieties. Foliage heavy rich dark green. Very hardy.

DEUTZIA, PRIDE OF ROCHESTER. Double white flowers, slightly tinged with rose, appear in mid-June.

DOGWOOD, RED-BRANCHED (Cornus Alba Sibirica). Bright red bark, white flowers, blue fruit; rapid grower; beautiful winter effect.

GOLDEN BELL (Forsythia). Vigorous, upright grower; pretension of yellow flowers in April. One of the best early blooming shrubs.

HONEYSUCKLE, BUSH (Lonicera Morrowii). Early white flowers in June, followed by red berries.

PINK MAGNOLIA (Magnolia Soulangeana). Our most outstanding early spring blooming plant. Large pink blooms. Grows in bush or tree form. Every garden should have one or two of these remarkable plants.

GARDS BURST INTO GLORY

With blooms of Harrisons’ Berlin, Maryland, grown Hi-Quality Flowering Shrub.

PRICES OF SHRUBS BELOW

Each 3 for

SYRINGA, SWEET MOCK ORANGE or GARLAND (Philadelphus Coronarius). Of upright habit, and produces in June a wealth of white, fragrant flowers.

SWEET-SCENTED SHRUB (Calycanthus Floridus). Hardy native with many double, chocolate-colored flowers in May. Flowers, leaves and wood have a spicy fragrance.

TAMARIX, AFRICAN (Tamarix African). Feather gray-green foliage; very showy.

TARTARIAN HONEYSUCKLE (Lonicera Tatarica). Very attractive in blossom, producing an abundance of flowers followed by red fruit. We offer pink and white varieties.

WEIGELA, PINK (Weigela Rosea). The most popular Weigela sold today. Its delicate pink, bell-shaped flowers are borne in great profusion along arching branches.

ROYAL BLUE HYDRANGEA

( Hydrangea Ottoe) Old favorite southern Hydrangean. When winters are severe we suggest heeling in. Large balls of blue flowers and attractive large leaves. Color depends on acidity of soil. Field-grown plants, $1.50 each; 2 for $2.80.

Everywhere people are making their homes more livable, more attractive. A little planning, a little planting. And what joy and satisfaction in having a home framed with beautiful trees and a well kept lawn planted to shrubs and flowers.

Harrison Brothers, Berlin, Maryland

PECANS—Abundant Nuts in Winter
NORTHERN STRAIN

CHINESE ELM

Grows 20 Feet in Four Years

Because of its beauty and extremely rapid growth, Chinese Elm has become a leading shade tree of America. It is planted in every state, and like its native country of Korea, withstands intense cold and extreme heat. It makes excellent shade in five short years, averaging about 5 feet growth with its every year. It resembles the American Elm except that leaves are smaller, with the gracefulness of a Cut-Leaf Birch. Prices: 3 to 4 ft., $1.75 each; 4 to 5 ft., $1.45 each; 5 to 6 ft., $1.95 each; 6 to 8 ft., $3.00 each.

CHINESE ELM—Quickest Growing Tree in the World

AMERICAN PLANE

(Platanus Americana)

Very attractive, well known, rapid growing shade tree. Foliage large and maple-like. Prices: 4 to 5 ft., $1.75 each; 5 to 6 ft., $2.75 each; 6 to 8 ft., $4.25 each.

AMERICAN ELM

(Ulmus americana)

A noble native tree of great size, wide spreading, gracefully curving branches, growing up in a form like the outline of long-stemmed flowers, in a tall vase. Prices: 4 to 5 ft., $1.45 each; 5 to 6 ft., $1.95 each; 6 to 8 ft., $3.00 each.

LOMBARDY POPULAR

A tall, spirelike tree used for screens and formal plantings. It is fast growing, distinctly ornamental and beautiful. Prices: 5 to 6 ft., $1.25 each; 6 to 8 ft., $1.50 each.

SILVER MAPLE

Rapid growing. Prices: 3 to 4 ft., $0.95 each; 4 to 5 ft., $1.45 each; 5 to 6 ft., $2.00 each; 6 to 8 ft., $3.25 each; 8 to 10 ft., $5.00 each; 10 to 12 ft., $7.50 each.

ORIENTAL ELM

The Famous Light Bark Tree

ORIENTAL PLANE

(Platanus Orientalis)

A rapid, upright, clean growing shade tree, long lived, beautiful dense foliage. A superb tree of gigantic proportions, which is very hardy. Won high popularity in recent years due to its many merits, which have made it the most useful and the most sought for shade tree for lawns, parks, streets and highway plantings. Prices: 4 to 5 ft., $1.75 each; 5 to 6 ft., $2.75 each; 6 to 8 ft., $4.25 each.

CHINESE CHESTNUTS

Now You Can Grow Chestnuts! Blight-Resistant Chestnut Trees

Only two years from this fall, right in your own grounds, you can pick big, fat, tasty Chestnuts from the trees you plant this year! Remember gathering Chestnuts in the good old days—haven't you felt sorry for your children because they couldn't? The devastating blight that stripped our forests of the native Chestnut was an American tragedy! Now these hardy, blight-resistant Chestnut trees will bring them back. More than that, you need not wait 15 to 20 years for nuts—they'll bear year after year! Plant in abundance Harrisons' strain of Chinese Chestnut trees.

PRICES: 2 to 3 ft., $2.50 each.

AMERICAN FILBERT

(Hazel Nut)

Old family favorite, an attractive bush, yielding abundant crops of tasty, round nuts. Bears when young.

PRICES: 2 to 3 ft., $2.00 each.

ENGLISH WALNUT

(Juglans Regia)

Thin shelled, large, delicious nuts, producing heavy crops and demanding good prices. The most popular Walnut grown.

PRICES: 2 to 3 ft., $2.75 each.
SPREADING YEW

The beautiful Yew of moderate bushy growth, usually grows wider than it does tall, starts branching from the bottom, developing into a bush form. The spreading branches are densely cloaked with short leaves of dull green. It is the most attractive spreading evergreen, will grow in semi-shady locations. Hardest of all Yews By trimming the side branches the plant can be made to develop lower to the ground. Can also be trimmed into globe shape. Prices: 12 to 15 inch $2.50 each. 8 TO 10 INCHES. $1.00.

GOLDEN RETINOSPORA

A handsome golden colored evergreen that is admired by all. Its pleasing shade provides the right amount of contrast when it is planted along with other evergreens along its side or back of it. Feathery, fernlike foliage can be kept trimmed to any size. No home foundation plantings are complete without this remarkable healthy evergreen. Price: 12 to 15 inches $2.00.

COMPACT GLOBULAR ARBOR-VITAE

Natural compact, globe-shaped, dark green foliage. Ideal low growing plant for massing against the taller evergreens in foundation plantings. Price: 12 to 15 inch $2.00. 8 TO 10 INCHES, EACH $1.00.

PYRAMIDAL ARBOR-VITAE

Probably no evergreen is more admired than Pyramidal Arbor-Vitae with its beautifully carved foliage of deep green, its graceful, refined habits and its artistic upright shape. These features make it indispensable in the home foundation groups and in the lawn and garden plantings. Price: 18 to 24 inch $3.00 each. 8 TO 10 INCHES., $1.00 EACH.

IRISH JUNIPER

Forms a narrow and dense column, compact; bluish green foliage. Most attractive when planted around the foundation of a home at corners and entrances. Price: 24 to 36 inch $3.00 each. 8 TO 10 INCHES, EACH $1.00.

All evergreens are shipped with Moss on the Roots.

American BOXWOOD

GROWN BY HARRISON BROTHERS
BERLIN, MARYLAND

—the real Aristocrat of the Evergreen family

YOU CAN SECURE THE FINEST SPECIMENS IN AMERICA FROM HARRISON'S

Possibly no evergreen shrub has been so much used for marking the boundaries of formal gardens, to outline flower beds, for low hedges, and for other ornamental purposes. The plants will adapt themselves to almost any situation and climate, and by judicious pruning can be trained to many forms.

Compact—Deep Glossy Leaves

Our Boxwood has deep glossy green leaves. They are dense, compact specimens, having been sheared many times. The leaves on this variety are small and resemble the dwarf English Boxwood. This variety is a dwarf grower, but it makes much faster growth than the English Boxwood. For those who want large Boxwood plants in a few years, this is the best variety to plant.

PRICES OF AMERICAN BOXWOOD

10 to 12 inches $1.50 each; 10 for $12.50

OLD ENGLISH BOXWOOD

The famous Dwarf Boxwood so much admired in old gardens. Slow growing, compact, most attractive. Will grow in sun or partial shade.

3 to 4 in. 55c ea.; 10 for $5.00
4 to 6 in. 85c ea.; 10 for $7.50
6 to 8 in. $1.25 ea.; 10 for $11.00

IRISH JUNIPER
AZALEA—A Miracle of Loveliness

AZALEA HINODEGIRI
Deep Coral-Pink Flowers

Azalea Hinodegiri is a dwarf grower with evergreen foliage. In the spring it produces a profusion of deep coral colored blossoms, completely hiding the foliage. Ideally suited for planting around the foundation of homes or adding color in front of evergreens. Grows well in the shade or sunlight.

AZALEA MACRANTHA
Large, single, salmon-red flowers. Late bloomer with dark green, glossy leaves that remain on the plant all winter. Same prices as Azalea hinodegiri.

FLAME. Bright flame red, suffused with copper.
CORAL BELLS. Shell-pink, shading deeper at center.
SALMON BEAUTY. Large salmon-pink flowers.

HEDGES

Beautiful living fences.

The Famous California Privet—The Best Low Cost Hedge Grown by Harrison Brothers, Berlin, Maryland

California Privet is the Leading Low Cost Hedge Plant

California Privet (Ligustrum ovalifolium) This is the universal hedge in the East, a fact proving that Privet has greater merit under ordinary conditions for this purpose than any other plant. For live fences at village, town and country homes it is the very best of all materials. On public grounds of all kinds, parks and cemeteries, along roads and paths, on factory grounds, and on newly subdivided areas near towns, nothing else can be used in its place, and in this place it is indispensable. It is the best of all hardy hedge plants. Can be easily kept at any height desired; has glossy, deep green leaves, and holds them until late fall. Its strong, quick, upright growth makes it useful for screening out unsightly objects.

SPIRaea Van Houttei

Always Makes an Attractive Hedge

Red-leaved Barberry

(Berberis Thunbergii Alatopurpurea) A highly important introduction among shrubs, giving us for the first time a practical, easily grown shrub of medium height, with good, distinctly red foliage. This must prove a boon to all types of landscaping, where studied contrasts are to be worked out with the shrub foliage combined on a color. Red berries during winter.

Spiraea Van Houttei

Always Makes an Attractive Hedge

Green Barberry

(Berberis Thunbergii) The best low dense hedge plant grown. Its abundant, small light green leaves, which turn to rich colors in autumn, and its wealth of scarlet berries make it very attractive. Extremely hardy and requires but little pruning. Ornamental and graceful the whole year.

Bush Arbutus

(Abelia Grandiflora) By far the best evergreen shrub. One of our beautiful, popular, and satisfactory broad-leaved evergreens. The graceful, drooping stems and branches are covered with dark, glossy leaves which make in winter a metallic sheen. From the middle of June until frost, this plant produces an immense quantity of tubular-shaped white flowers tinged with pink, about an inch long, which are borne in clusters. Good for shady locations.

HARDY VINES

Nature's Draperies

Boston or Japanese Ivy (Ameloposus Yezoche). A popular climber, clinging firmly to brick, stone or other material; deep, glossy green, ivy-shaped foliage which turns to cream and gold color in autumn. Price: $1.25 each.

English Ivy (Hedera Helix). The most popular evergreen vine; large, deep green, glossy foliage. Excellent for covering walls. Useful for shady locations. Price: $1.00 each.

Hall's Honeysuckle. Deep glossy green foliage; fragrant flowers from July to fall. Price: $1.00 each.

Sweet Autumn Clematis (Clematis paniculata). A splendid climber for covering porches and trellises. Flowers snowy white, produced in immense quantities during late summer and autumn. Price: $1.00 each.

Silver Lace Vine (Polygonum Auberti). Will rapidly grow 20 feet or more. Forms cloud of lacy, misty white, shot with tints of cream and pale rose. Green foliage, lightly bronzed at tips. Price: $1.25 each.

You can place your order with us with complete confidence. It is our earnest desire that each and every one of our customers be fully satisfied in their dealings with us. If you are not and feel that it is our fault in any way, please write to us. No transaction is complete unless you are completely satisfied.

IT WILL BE GREATLY APPRECIATED IF YOU WILL WRITE THE NAME AND ADDRESS OF A FRIEND WHO IS INTERESTED IN PLANTING FRUIT TREES, BERRY PLANTS OR ORNAMENTALS. THANKS.

**ABOUT SHIPPING—PLEASE READ**

**HOW WE SHIP**—All stock is priced f. o. b. Berlin, Maryland. The method by which shipment can be made depends entirely on the type of stock and quantity ordered. Small size fruit trees, strawberry plants, small fruits, roses, small shrubs, vines and peonies can be shipped by parcel post when ordered in small quantities. We estimate the postage on these items to be about 10% of the purchase price of the plants. If sufficient postage is not remitted with order we reserve the right to change the method of shipment, or we will ship by parcel post and customer can then pay the additional postage. Any excess postage charges which are sent to us will be refunded. Large size fruit trees, shade trees, evergreens, etc., also large quantities of small size fruit trees, small fruits, roses, shrubs, vines, peonies, etc., cannot be shipped by parcel post due to size, length and weight and they must be shipped by express or freight with the customer paying the transportation charges when they are delivered. Freight is the cheapest way of shipping balled and burlapped plants such as evergreens, boxwood, aralias, etc., also shade trees, shrubs, and small fruits when ordered in medium to large quantities. $0.00 or more strawberry plants should go forward by express. When sending in your order, be sure to give us the name of the nearest express or freight station. If you will leave the matter to us we will ship your order the best way. Safe arrival guaranteed.

**WHEN TO SHIP**—Our fall shipping season commences about October 15th and continues through the winter and in the spring until May 15th. Order early and we will make the shipment any time that you might desire. If no specified date is requested we will ship the stock at proper planting time for your section.
